GHOSTHUNTING is a common sense approach to the investigation and resolution of cases of reported ghostly happenings, including apparitions, hauntings and poltergeists. Written so that the reader quickly grasps what parapsychologists think ghosts are and how to best deal with the phenomena and the experiences of the people having them. Covers the investigative process from the initial call and assessment to the on-site investigative techniques and technology. Deals with how to come up with solutions and resolutions—ways to get "rid" of the phenomena. Includes a discussion of the use of technology and the use of psychics in paranormal investigations and if anyone can prove the existence of ghosts. Finally, the book covers information resources and organizations that the new ghost-hunter and the person who encounters a ghost can find to learn more about the subject and for help with cases they're investigating or phenomena they're experiencing.
