Revisions based on new material from journals (especially JAMA, New England Journal of Medicine, Mayo Clinic Proceedings, and Annals of Internal Medicine); CME conferences, especially the weekly grand rounds at Carondelet St. Joseph's Hospital; specialty conferences pertaining to orthopedics and neurology; and cases that recently came up in practice

More than 120 additional references, some new and some old classics newly discovered by the author

Expanded discussion of evidence-based medicine, both its appropriate usage and pitfalls, with additional information on sensitivity, specificity, and other features of various findings from recent studies and review articles. Insights on the development of expertise have been added.

Expanded discussion of sleep apnea, blast injury, "minor" head trauma, and cervical spine involvement in rheumatoid arthritis

New findings pertaining to transplantation-related graft-versus-host problems, AIDS and the adverse effects of therapy, drug abuse, especially methamphetamine, and egg donation

Additional maneuvers include the scapulothoracic reflex, the head thrust test, the apprehension test, and a newly described test for intercostal muscle innervation

Additional information on dementia, hysteria, missed aneurysms, pulmonary embolism, evaluation of dehydration/malnutrition, and compressions-only cardiopulmonary resuscitation
