Studies in Natural Products Chemistry: Stereoselective Synthesis: 14

Studies in Natural Products Chemistry, Volume 14: Stereoselective Synthesis, Part I is a collection of discourses on the stereoselective synthesis of the anticancer anthracycline antibiotics; tetramic acid antibiotics; 3- and 4-deoxyhexoses; polysaccharides; levoglucosenone as precursor to natural products; synthesis of oligoribonucleotides; and oxidation of guaiazulene.

This volume deals with a broad range of natural products focusing on the synthesis of antibiotics and anticancer agents — anthracyclines, tetramic acid, taxodione, vinblastine, and vincristine. These aforementioned drugs are used for the treatment of cancer (anthracyclines) and Hodgkin's disease and childhood acute leukemia (vinblastine and vincristine). The importance of the latest developments in the stereocontrolled synthesis of polysaccharides is discussed as polysaccharides play a fundamental role in cell life and have many technical applications. The synthesis of bioactive carbohydrates 3- and 4-deoxy-hexoses is compared with the more occurring deoxyhexoses in nature such as the 2-deoxy, 6-deoxy, and 2,6-dideoxy-hexoses, because the former are rare compounds and useful tools in the study of biological and biochemical properties of mono- and oligosaccharides, glycoproteins, and antibiotics. Alkaloids derived from Apocynaceae are known for their medicinal properties; hence the synthetic approaches to vinblastine and vincristine are discussed. Because of the minute amounts available from herbal sources, efforts toward their chemical synthesis are given more reference. This book can be a useful reference for the organic chemists. Chemical researchers, pharmaceutical scientists, and professionals of bioorganic chemistry will likewise gain a lot from this collection.

From reader reviews:

Clementine Frazier:

Why don't make it to be your habit? Right now, try to ready your time to do the important act, like looking for your favorite e-book and reading a guide. Beside you can solve your condition; you can add your knowledge by the guide entitled Studies in Natural Products Chemistry: Stereoselective Synthesis: 14. Try to make book Studies in Natural Products Chemistry: Stereoselective Synthesis: 14 as your good friend. It means that it can to become your friend when you truly feel alone and beside those of course make you smarter than in the past. Yeah, it is very fortunated for you personally. The book makes you much more confidence because you can know almost everything by the book. So , we should make new experience as well as knowledge with this book.

Johnny Powers:

Does one one of the book lovers? If so, do you ever feeling doubt if you are in the book store? Try to pick one book that you just dont know the inside because don't determine book by its cover may doesn't work here is difficult job because you are frightened that the inside maybe not seeing that fantastic as in the outside appearance likes. Maybe you answer may be Studies in Natural Products Chemistry: Stereoselective Synthesis: 14 why because the fantastic cover that make you consider about the content will not disappoint you actually. The inside or content is usually fantastic as the outside or even cover. Your reading 6th sense will directly make suggestions to pick up this book.

Susan Frame:

That guide can make you to feel relax. That book Studies in Natural Products Chemistry: Stereoselective Synthesis: 14 was colourful and of course has pictures on the website. As we know that book Studies in Natural Products Chemistry: Stereoselective Synthesis: 14 has many kinds or category. Start from kids until teenagers. For example Naruto or Private eye Conan you can read and believe you are the character on there. So , not at all of book usually are make you bored, any it offers up you feel happy, fun and unwind. Try to choose the best book for you and try to like reading that.

Daniel Adams:

As a student exactly feel bored to help reading. If their teacher questioned them to go to the library or to make summary for some guide, they are complained. Just very little students that has reading's heart or real their passion. They just do what the professor want, like asked to the library. They go to right now there but nothing reading significantly. Any students feel that examining is not important, boring and can't see colorful pics on there. Yeah, it is for being complicated. Book is very important for you. As we know that on this time, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore , this Studies in Natural Products Chemistry: Stereoselective Synthesis: 14 can make you experience more interested to read.
