The Science of Vehicle Dynamics: Handling, Braking, and Ride of Road and Race Cars

Massimo Guiggiani

The Science of Vehicle Dynamics: Handling, Braking, and Ride of Road and Race Cars Massimo Guiggiani

Vehicle dynamics is often perceived as a quite intuitive subject. As a matter of fact, lots of people are able to drive a car. Nevertheless, without a rigorous mathematical formulation it is very difficult to truly understand the physical phenomena involved in the motion of a road vehicle. In this book, mathematical models of vehicles are developed, always paying attention to state the relevant assumptions and to provide explanations for each step. This approach allows for a deep, yet simple, analysis of the dynamics of vehicles, without having to resort to foggy concepts. The reader will soon achieve a clear understanding of the subject, which will be of great help both in dealing with the challenges of designing and testing new vehicles and in tackling new research topics. The book covers handling and performance of both road and race cars. A new approach, called MAP (Map of Achievable Performance), is presented and thoroughly discussed. It provides a global and intuitive picture of the handling features of a vehicle. Moreover, the book also deals with several relevant topics in vehicle dynamics that have never been discussed before. Massimo Guiggiani is professor of Applied Mechanics at the Università di Pisa, where he also teaches Vehicle Dynamics in the MS degree program in Vehicle Engineering. From reader reviews:

Mamie Perkins:

What do you think of book? It is just for students since they're still students or that for all people in the world, the actual best subject for that? Just you can be answered for that problem above. Every person has diverse personality and hobby for every other. Don't to be forced someone or something that they don't need do that. You must know how great along with important the book The Science of Vehicle Dynamics: Handling, Braking, and Ride of Road and Race Cars. All type of book is it possible to see on many solutions. You can look for the internet solutions or other social media.

Brian Rocha:

Now a day those who Living in the era where everything reachable by interact with the internet and the resources in it can be true or not require people to be aware of each facts they get. How individuals to be smart in receiving any information nowadays? Of course the answer then is reading a book. Looking at a book can help folks out of this uncertainty Information particularly this The Science of Vehicle Dynamics: Handling, Braking, and Ride of Road and Race Cars book as this book offers you rich details and knowledge. Of course the details in this book hundred pct guarantees there is no doubt in it you probably know this.

Theresa Braun:

Does one one of the book lovers? If so, do you ever feeling doubt if you find yourself in the book store? Make an effort to pick one book that you just dont know the inside because don't determine book by its cover may doesn't work here is difficult job because you are frightened that the inside maybe not seeing that fantastic as in the outside appear likes. Maybe you answer is usually The Science of Vehicle Dynamics: Handling, Braking, and Ride of Road and Race Cars why because the wonderful cover that make you consider in regards to the content will not disappoint you. The inside or content is actually fantastic as the outside or perhaps cover. Your reading 6th sense will directly direct you to pick up this book.

Donna Gamble:

Is it a person who having spare time in that case spend it whole day by watching television programs or just laying on the bed? Do you need something totally new? This The Science of Vehicle Dynamics: Handling, Braking, and Ride of Road and Race Cars can be the response, oh how comes? A fresh book you know. You are thus out of date, spending your time by reading in this new era is common not a nerd activity. So what these books have than the others?
