Linux System Programming: Talking Directly to the Kernel and C Library

Robert Love

Linux System Programming: Talking Directly to the Kernel and C Library Robert Love

Write software that draws directly on services offered by the Linux kernel and core system libraries. With this comprehensive book, Linux kernel contributor Robert Love provides you with a tutorial on Linux system programming, a reference manual on Linux system calls, and an insider's guide to writing smarter, faster code.

Love clearly distinguishes between POSIX standard functions and special services offered only by Linux. With a new chapter on multithreading, this updated and expanded edition provides an in-depth look at Linux from both a theoretical and applied perspective over a wide range of programming topics, including:

- A Linux kernel, C library, and C compiler overview
- Basic I/O operations, such as reading from and writing to files
- Advanced I/O interfaces, memory mappings, and optimization techniques
- The family of system calls for basic process management
- Advanced process management, including real-time processes
- Thread concepts, multithreaded programming, and Pthreads
- File and directory management
- Interfaces for allocating memory and optimizing memory access
- Basic and advanced signal interfaces, and their role on the system
- Clock management, including POSIX clocks and high-resolution timers

From reader reviews:

Homer Douglas:

The book with title Linux System Programming: Talking Directly to the Kernel and C Library includes a lot of information that you can discover it. You can get a lot of gain after read this book. This particular book exist new know-how the information that exist in this book represented the condition of the world currently. That is important to yo7u to understand how the improvement of the world. This book will bring you within new era of the globalization. You can read the e-book in your smart phone, so you can read the idea anywhere you want.

William Hickman:

Do you have something that you like such as book? The guide lovers usually prefer to decide on book like comic, limited story and the biggest the first is novel. Now, why not hoping Linux System Programming: Talking Directly to the Kernel and C Library that give your fun preference will be satisfied by reading this book. Reading habit all over the world can be said as the opportunity for people to know world better then how they react towards the world. It can't be explained constantly that reading practice only for the geeky man but for all of you who wants to be success person. So , for all you who want to start reading through as your good habit, it is possible to pick Linux System Programming: Talking Directly to the Kernel and C Library become your personal starter.

Thomas Taylor:

Do you really one of the book lovers? If yes, do you ever feeling doubt when you find yourself in the book store? Try to pick one book that you just dont know the inside because don't evaluate book by its handle may doesn't work at this point is difficult job because you are afraid that the inside maybe not while fantastic as in the outside seem likes. Maybe you answer might be Linux System Programming: Talking Directly to the Kernel and C Library why because the amazing cover that make you consider with regards to the content will not disappoint a person. The inside or content is usually fantastic as the outside or cover. Your reading sixth sense will directly direct you to pick up this book.

Melinda Walton:

A lot of people said that they feel uninterested when they reading a reserve. They are directly felt the idea when they get a half elements of the book. You can choose typically the book Linux System Programming: Talking Directly to the Kernel and C Library to make your current reading is interesting. Your own personal skill of reading talent is developing when you similar to reading. Try to choose straightforward book to make you enjoy you just read it and mingle the opinion about book and reading through especially. It is to be very first opinion for you to like to start a book and read it. Beside that the guide Linux System Programming: Talking Directly to the Kernel and C Library can to be your new friend when you're feel alone and confuse in doing what must you're doing of the time.
