Soft Shore Protection: An Environmental Innovation in Coastal Engineering (Coastal Systems and Continental Margins)

Soft Shore Protection: An Environmental Innovation in Coastal Engineering (Coastal Systems and Continental Margins)

Global warming, melting polar caps, rising sea levels and intensifying wave-current action, factors responsible for the alarming phenomena of coastal erosion on the one hand and adverse environmental impacts and the high cost of 'hard' protection schemes, on the other, have created interest in the detailed examination of the potential and range of applicability of the emerging and promising category of 'soft' shore protection methods. 'Soft' methods such as beach nourishment, submerged breakwaters, artificial reefs, gravity drain systems, floating breakwaters, plantations of hydrophyllous shrubs or even dry branches, applied mostly during the past 20 years, are recognised as possessing technical, environmental and financial advantageous properties deserving more attention and further developmental experimentation than has occurred hitherto. On the other hand, 'hard' shore protection methods such as seawalls, groins and detached breakwaters, artefacts borrowed from port design and construction technology, no matter how well designed and well implemented they may be, can hardly avoid intensification of the consequential erosive, often devastating, effects on the down-drift shores. Moreover, they often do not constitute environmentally and financially attractive solutions for long stretches of eroding shoreline. Engineers and scientists practising design and implementation of shore defence schemes have been aware for many years of the public demand for improved shore protection technologies. They are encouraging efforts that promise enrichment of those environmentally sound and financially attractive methods that can be safely applied.

From reader reviews:

Tara Scribner:

Have you spare time for any day? What do you do when you have a lot more or little spare time? Yep, you can choose the suitable activity for spend your time. Any person spent their particular spare time to take a go walking, shopping, or went to the particular Mall. How about open or perhaps read a book eligible Soft Shore Protection: An Environmental Innovation in Coastal Engineering (Coastal Systems and Continental Margins)? Maybe it is being best activity for you. You realize beside you can spend your time along with your favorite's book, you can smarter than before. Do you agree with its opinion or you have additional opinion?

Ralph Scott:

This Soft Shore Protection: An Environmental Innovation in Coastal Engineering (Coastal Systems and Continental Margins) are generally reliable for you who want to become a successful person, why. The reason of this Soft Shore Protection: An Environmental Innovation in Coastal Engineering (Coastal Systems and Continental Margins) can be on the list of great books you must have is usually giving you more than just simple reading food but feed a person with information that possibly will shock your preceding knowledge. This book is usually handy, you can bring it everywhere you go and whenever your conditions in the e-book and printed people. Beside that this Soft Shore Protection: An Environmental Innovation in Coastal Engineering (Coastal Systems and Continental Margins) giving you an enormous of experience for example rich vocabulary, giving you demo of critical thinking that we all know it useful in your day activity. So , let's have it and luxuriate in reading.

Catherine Stoltenberg:

The actual book Soft Shore Protection: An Environmental Innovation in Coastal Engineering (Coastal Systems and Continental Margins) has a lot details on it. So when you read this book you can get a lot of gain. The book was compiled by the very famous author. The writer makes some research prior to write this book. This specific book very easy to read you can obtain the point easily after reading this book.

David Scott:

As a university student exactly feel bored to help reading. If their teacher asked them to go to the library or to make summary for some guide, they are complained. Just small students that has reading's internal or real their pastime. They just do what the trainer want, like asked to the library. They go to generally there but nothing reading really. Any students feel that examining is not important, boring along with can't see colorful pics on there. Yeah, it is to become complicated. Book is very important in your case. As we know that on this period of time, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. Therefore this Soft Shore Protection: An Environmental Innovation in Coastal Engineering (Coastal Systems and Continental Margins) can make you sense more interested to read.
