Studies of Historical Earthquakes in Southern Poland: Outer Western Carpathian Earthquake of December 3, 1786, and First Macroseismic Maps in 1858-1901 (GeoPlanet: Earth and Planetary Sciences)

Studies of Historical Earthquakes in Southern Poland: Outer Western Carpathian Earthquake of December 3, 1786, and First Macroseismic Maps in 1858-1901 (GeoPlanet: Earth and Planetary Sciences)

This book examines old and new data on some of the 18th and 19th century earthquakes that either occurred or were clearly felt in southern regions of Poland. Particular emphasis is put on a detailed study and reinterpretation of the unusually severe Outer Western Carpathians earthquake on December 3, 1786 (7 IO, 5.3 Mw, 35 km depth), which was the last in a series of seismic events in the years 1785 and 1786. An assessment is also made of what we presently know about the seismicity of the Western Carpathians in Poland based on to instrumental data. The book also presents material relating to earthquakes of 6-9 IO that affected south Poland and the surrounding regions: Žilina in Slovakia (1858), Gera in Thuringia (1872), the Sudetes on the Czech-Polish border (1883, 1901), and Lower Silesia, Poland (1895). These are analyzed and illustrated by 17 contemporary macroseismic intensity maps, some of which are considered to be remarkable for those times. A new seismic catalog for Poland is provided with amendments and updates up to the end of 2014. Noteworthy is the data on two unforeseen events: one about 60 km NE of the Polish border in 2004 and one in central Poland in 2012. It shows how important it is, not least for practical engineering purposes, to perform seismic monitoring even in seemingly aseismic regions.

From reader reviews:

Rosa Nguyen:

This Studies of Historical Earthquakes in Southern Poland: Outer Western Carpathian Earthquake of December 3, 1786, and First Macroseismic Maps in 1858-1901 (GeoPlanet: Earth and Planetary Sciences) book is not ordinary book, you have after that it the world is in your hands. The benefit you have by reading this book is information inside this guide incredible fresh, you will get facts which is getting deeper you actually read a lot of information you will get. This Studies of Historical Earthquakes in Southern Poland: Outer Western Carpathian Earthquake of December 3, 1786, and First Macroseismic Maps in 1858-1901 (GeoPlanet: Earth and Planetary Sciences) without we recognize teach the one who studying it become critical in contemplating and analyzing. Don't possibly be worry Studies of Historical Earthquakes in Southern Poland: Outer Western Carpathian Earthquake of December 3, 1786, and First Macroseismic Maps in 1858-1901 (GeoPlanet: Earth and Planetary Sciences) can bring whenever you are and not make your carrier space or bookshelves' turn out to be full because you can have it with your lovely laptop even phone. This Studies of Historical Earthquakes in Southern Poland: Outer Western Carpathian Earthquake of December 3, 1786, and First Macroseismic Maps in 1858-1901 (GeoPlanet: Earth and Planetary Sciences) having very good arrangement in word as well as layout, so you will not really feel uninterested in reading.

David Colon:

Do you considered one of people who can't read gratifying if the sentence chained in the straightway, hold on guys this particular aren't like that. This Studies of Historical Earthquakes in Southern Poland: Outer Western Carpathian Earthquake of December 3, 1786, and First Macroseismic Maps in 1858-1901 (GeoPlanet: Earth and Planetary Sciences) book is readable by you who hate those perfect word style. You will find the info here are arrange for enjoyable reading through experience without leaving also decrease the knowledge that want to supply to you. The writer associated with Studies of Historical Earthquakes in Southern Poland: Outer Western Carpathian Earthquake of December 3, 1786, and First Macroseismic Maps in 1858-1901 (GeoPlanet: Earth and Planetary Sciences) content conveys the idea easily to understand by many individuals. The printed and e-book are not different in the content material but it just different as it. So , do you even now thinking Studies of Historical Earthquakes in Southern Poland: Outer Western Carpathian Earthquake of December 3, 1786, and First Macroseismic Maps in 1858-1901 (GeoPlanet: Earth and Planetary Sciences) is not loveable to be your top listing reading book?

Margaret Hall:

People live in this new day time of lifestyle always attempt to and must have the time or they will get wide range of stress from both way of life and work. So , once we ask do people have free time, we will say absolutely yes. People is human not really a huge robot. Then we inquire again, what kind of activity do you possess when the spare time coming to an individual of course your answer will probably unlimited right. Then ever try this one, reading books. It can be your alternative inside spending your spare time, the particular book you have read will be Studies of Historical Earthquakes in Southern Poland: Outer Western Carpathian Earthquake of December 3, 1786, and First Macroseismic Maps in 1858-1901 (GeoPlanet: Earth

and Planetary Sciences).

Alexandra Dickey:

As a pupil exactly feel bored to reading. If their teacher requested them to go to the library or make summary for some book, they are complained. Just minor students that has reading's heart and soul or real their hobby. They just do what the educator want, like asked to the library. They go to generally there but nothing reading critically. Any students feel that studying is not important, boring and also can't see colorful pics on there. Yeah, it is for being complicated. Book is very important in your case. As we know that on this period, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. Therefore , this Studies of Historical Earthquakes in Southern Poland: Outer Western Carpathian Earthquake of December 3, 1786, and First Macroseismic Maps in 1858-1901 (GeoPlanet: Earth and Planetary Sciences) can make you sense more interested to read.
