Water Reclamation Standard: Laboratory Testing of Systems Using Grey Water (Technical Note)

Reginald Brown, A. Palmer

This title provides a methodology for establishing the safety and performance of packaged water reclamation systems through laboratory testing using synthetic grey water. Some specific technical requirements for water reclamation systems are also included. It takes account of information produced during the Buildings That Save Water (BTSW) project and the WRAS guidance concerning the use of reclaimed water for toilet flushing, irrigation and vehicle washing purposes in the UK. Sections include classification of systems, manufacturers data, constructional requirements, measurements, test condition, test procedure, performance requirements, and a test report.
