Learning About Learning Disabilities

Bernice Wong's **Learning about Learning Disabilities** was the first text to give equal attention to the intellectual, conceptual, and practical aspects of learning disabilities. The **Third Edition** of this popular title presents 80% new material, keeping the chapters up to date in this fast-moving field. With new contributors, and seven new chapters, coverage is both comprehensive and thorough, with three sections encompassing the research aspects of learning disabilities, the instructional aspects of learning disabilities, and the issues germane to different age ranges of the learning disabled: children, adolescents, and adults.

Chapters summarizing research on learning disabilities include coverage of ADHD, memory, language processing, social competence, self-regulation, and brain structures as they apply to learning disabilities. Chapters focusing on instructional aspects of learning disabilities include coverage of teaching literacy, reading comprehension, writing, and mathematics.
