Molecular Biology of Cancer: Mechanisms, Targets, and Therapeutics Lauren Pecorino

Cells in our body undergo tightly regulated replication to enable growth to occur in a precise, and to ensure that damaged or worn out tissues are replaced. Regulation is mediated via many different mechanisms; it is when these mechanisms fail, and regulation is lost, that cancer can result. Recent advances in molecular cell biology have greatly expanded our understanding of the processes and mechanisms which underpin the regulation of cell replication, and what is happening at the molecular level when these fail. The third edition of *The Molecular Biology of Cancer: Mechanisms, Targets, and Therapeutics* offers a fresh approach to the study of the molecular basis of cancer, by showing how our understanding of the defective mechanisms which drive cancer is leading to the development of new targeted therapeutic agents. Opening with an overview of the key hallmarks of cancer as a disease state, the book then leads us through the principal processes that become altered in cancer cells, and explains how the failure of these processes can lead to the onset of cancer. Uniquely, within each chapter, students are shown how this molecular knowledge is being applied to develop new targeted therapeutic strategies. Written with the student learner in mind, the book features a variety of learning features to help students engage with, and master, the concepts presented. The emphasis is not on exhaustive coverage of the field, but on acquiring a solid understanding of the essentials of the subject - and an appreciation of how a theoretical understanding can be transformed into therapeutic benefit. *The Molecular Biology of Cancer* is an invaluable resource for any student wishing to gain an insight into the molecular basis of the disease, and possible solutions for its effective control.

Online Resource Centre

The Online Resource Centre to accompany *The Molecular Biology of Cancer* features:

- For students:
 - Hyperlinks to primary literature articles featured in the text
 - News feeds relevant to cancer biology, drawn from a variety of publications
- For registered adopters of the book:
 - Figures from the book, available to download
 - A test bank of questions, with feedback linked to the book, for use in formative or summative assessment

From reader reviews:

Anthony Green:

The book Molecular Biology of Cancer: Mechanisms, Targets, and Therapeutics make one feel enjoy for your spare time. You should use to make your capable a lot more increase. Book can for being your best friend when you getting stress or having big problem using your subject. If you can make studying a book Molecular Biology of Cancer: Mechanisms, Targets, and Therapeutics to become your habit, you can get more advantages, like add your capable, increase your knowledge about several or all subjects. You could know everything if you like open up and read a publication Molecular Biology of Cancer: Mechanisms, Targets, and Therapeutics. Kinds of book are a lot of. It means that, science reserve or encyclopedia or others. So , how do you think about this e-book?

Dwayne Moseley:

Here thing why this Molecular Biology of Cancer: Mechanisms, Targets, and Therapeutics are different and trusted to be yours. First of all reading a book is good but it depends in the content of computer which is the content is as delicious as food or not. Molecular Biology of Cancer: Mechanisms, Targets, and Therapeutics giving you information deeper and different ways, you can find any book out there but there is no book that similar with Molecular Biology of Cancer: Mechanisms, Targets, and Therapeutics. It gives you thrill reading through journey, its open up your personal eyes about the thing which happened in the world which is perhaps can be happened around you. You can actually bring everywhere like in park your car, café, or even in your technique home by train. If you are having difficulties in bringing the imprinted book maybe the form of Molecular Biology of Cancer: Mechanisms, Targets, and Therapeutics in e-book can be your alternative.

Cathy Duran:

People live in this new day of lifestyle always try and and must have the free time or they will get lot of stress from both way of life and work. So , if we ask do people have spare time, we will say absolutely without a doubt. People is human not just a robot. Then we ask again, what kind of activity do you possess when the spare time coming to anyone of course your answer will probably unlimited right. Then do you try this one, reading guides. It can be your alternative with spending your spare time, the book you have read will be Molecular Biology of Cancer: Mechanisms, Targets, and Therapeutics.

Pedro Murray:

In this age globalization it is important to someone to acquire information. The information will make anyone to understand the condition of the world. The healthiness of the world makes the information much easier to share. You can find a lot of sources to get information example: internet, paper, book, and soon. You will observe that now, a lot of publisher that will print many kinds of book. The book that recommended to your account is Molecular Biology of Cancer: Mechanisms, Targets, and Therapeutics this book consist a

lot of the information from the condition of this world now. This kind of book was represented how can the world has grown up. The language styles that writer use to explain it is easy to understand. Often the writer made some exploration when he makes this book. Honestly, that is why this book ideal all of you.
