**Studies in Natural Products Chemistry: Chapter 1. Bioprospecting in the Berkeley Pit: The Use of Signal Transduction Enzyme Inhibition Assays to Isolate ... Fungi of an Acid Mine Waste Lake** Andrea A. Stierle, Donald B. Stierle

The search for extremophiles conjures the image of daring adventurers exploring dramatic geologic or climatologic phenomena. Berkeley Pit Lake, however, is not buried deep in the ocean, cradled in a volcanic caldera, or marooned at the southern tip of Antarctica. Instead, it is nestled in a mineral-rich formation in the Rocky Mountains in Butte, Montana. The Berkeley Pit evolved from an open-pit copper mine to an acid mine waste lake in less than 20 years. Today, Berkeley Pit Lake is part of the largest Superfund site in the USA. The Environmental Protection Agency and Montana residents view the Berkeley Pit as an ecological time bomb, but it is something more—an evolving and dynamic ecosystem, a classic by-product of the industrial age. Although conditions within the Pit Lake system are toxic for “normal” aquatic biota, these same conditions provide an ideal environment for extremophiles. Since 1995, we have isolated over 60 fungi and bacteria from the waters and basal sediments of the Pit Lake. Specific signal transduction enzyme inhibition assays were used to guide the isolation of bioactive secondary metabolites from broth cultures of selected microbes. Compounds that were isolated based on their ability to inhibit matrix metalloproteinase-3 have demonstrated selective activity against specific cancer cell lines in the National Cancer Institute's human cancer cell line screen. Caspase-1 inhibitors have shown selective cytotoxicity toward leukemia cell lines and have demonstrated the ability to mitigate the production of proinflammatory cytokines in induced inflammasome assays. This review describes the compounds isolated from this hostile environment and compares them to secondary metabolites isolated from other acid mine waste lakes.

**From reader reviews:**

**Peter Tesch:**

The book *Studies in Natural Products Chemistry: Chapter 1. Bioprospecting in the Berkeley Pit: The Use of Signal Transduction Enzyme Inhibition Assays to Isolate ... Fungi of an Acid Mine Waste Lake* can give more knowledge and information about everything you want. Exactly why must we leave a very important thing like a book *Studies in Natural Products Chemistry: Chapter 1. Bioprospecting in the Berkeley Pit: The Use of Signal Transduction Enzyme Inhibition Assays to Isolate ... Fungi of an Acid Mine Waste Lake*? A few of you have a different opinion about e-book. But one aim that book can give many information for us. It is absolutely appropriate. Right now, try to closer with your book. Knowledge or information that you take for that, you can give for each other; you may share all of these. Book *Studies in Natural Products Chemistry: Chapter 1. Bioprospecting in the Berkeley Pit: The Use of Signal Transduction Enzyme Inhibition Assays to Isolate ... Fungi of an Acid Mine Waste Lake* has simple shape but you know: it has great and massive function for you. You can look the enormous world by available and read a publication. So it is very wonderful.

**Charles Jose:**

The reason? Because this *Studies in Natural Products Chemistry: Chapter 1. Bioprospecting in the Berkeley Pit: The Use of Signal Transduction Enzyme Inhibition Assays to Isolate ... Fungi of an Acid Mine Waste Lake* is an unordinary book that the inside of the book waiting for you to snap the item but latter it will surprise you with the secret this inside. Reading this book adjacent to it was fantastic author who write the book in such incredible way makes the content within easier to understand, entertaining technique but still convey the meaning fully. So , it is good for you because of not hesitating having this nowadays or you going to regret it. This excellent book will give you a lot of positive aspects than the other book get such as help improving your skill and your critical thinking method. So , still want to hold off having that book? If I had been you I will go to the guide store hurriedly.

**Latonya Sams:**

In this era globalization it is important to someone to receive information. The information will make professionals understand the condition of the world. The condition of the world makes the information quicker to share. You can find a lot of recommendations to get information example: internet, paper, book, and soon. You will observe that now, a lot of publisher in which print many kinds of book. The particular book that recommended to your account is *Studies in Natural Products Chemistry: Chapter 1. Bioprospecting in the Berkeley Pit: The Use of Signal Transduction Enzyme Inhibition Assays to Isolate ... Fungi of an Acid Mine Waste Lake* this reserve consist a lot of the information on the condition of this world now. This specific book was represented just how can the world has grown up. The vocabulary styles that writer use to explain it is easy to understand. The actual writer made some investigation when he makes this book. This is why this book appropriate all of you.

**Frederick Palazzo:**

This *Studies in Natural Products Chemistry: Chapter 1. Bioprospecting in the Berkeley Pit: The Use of Signal Transduction Enzyme Inhibition Assays to Isolate ... Fungi of an Acid Mine Waste Lake* is a new way for you who has attention to look for some information as it relieves your hunger for information. Getting deeper you onto it getting knowledge more you know or else you who still having tiny amount of digest in reading this *Studies in Natural Products Chemistry: Chapter 1. Bioprospecting in the Berkeley Pit: The Use of Signal Transduction Enzyme Inhibition Assays to Isolate ... Fungi of an Acid Mine Waste Lake* can be the light food for you personally because the information inside this specific book is easy to get by simply anyone. These books build itself in the form which is reachable by anyone, yes I mean in the e-book form. People who think that in guide form make them feel drowsy even dizzy this reserve is the answer. So there is not any in reading a reserve especially this one. You can find actually looking for. It should be here for you. So, don't miss the item! Just read this e-book variety for your better life and also knowledge.
