Knowledge Discovery from Data Streams (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) Joao Gama

Since the beginning of the Internet age and the increased use of ubiquitous computing devices, the large volume and continuous flow of distributed data have imposed new constraints on the design of learning algorithms. Exploring how to extract knowledge structures from evolving and time-changing data, **Knowledge Discovery from Data Streams** presents a coherent overview of state-of-the-art research in learning from data streams.

The book covers the fundamentals that are imperative to understanding data streams and describes important applications, such as TCP/IP traffic, GPS data, sensor networks, and customer click streams. It also addresses several challenges of data mining in the future, when stream mining will be at the core of many applications. These challenges involve designing useful and efficient data mining solutions applicable to real-world problems. In the appendix, the author includes examples of publicly available software and online data sets.

This practical, up-to-date book focuses on the new requirements of the next generation of data mining. Although the concepts presented in the text are mainly about data streams, they also are valid for different areas of machine learning and data mining.

From reader reviews:

Lauren Marine:

In this 21st century, people become competitive in every single way. By being competitive now, people have to do something to make these people survive, being in the middle of the crowded place and notice by means of surrounding. One thing that often many people have underestimated the item for a while is reading. That's why, by reading a book your ability to survive increase then having chance to endure than other is high. In your case who want to start reading a book, we give you this Knowledge Discovery from Data Streams (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) book as nice and daily reading e-book. Why, because this book is greater than just a book.

Christi Ross:

The reserve with title Knowledge Discovery from Data Streams (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) possesses a lot of information that you can learn it. You can get a lot of help after read this book. This kind of book exist new information the information that exist in this reserve represented the condition of the world now. That is important to you to find out how the improvement of the world. That book will bring you in new era of the internationalization. You can read the e-book on your smart phone, so you can read this anywhere you want.

Kurt Haney:

This Knowledge Discovery from Data Streams (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) is great publication for you because the content that is certainly full of information for you who always deal with world and have to make decision every minute. That book reveal it information accurately using great coordinate word or we can claim no rambling sentences in it. So if you are read it hurriedly you can have whole details in it. Doesn't mean it only provides you with straight forward sentences but tough core information with beautiful delivering sentences. Having Knowledge Discovery from Data Streams (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) in your hand like getting the world in your arm, facts in it is not ridiculous one particular. We can say that no guide that offer you world throughout ten or fifteen tiny right but this e-book already do that. So , it is good reading book. Heya Mr. and Mrs. hectic do you still doubt this?

Patricia Stokes:

Do you like reading a reserve? Confuse to looking for your chosen book? Or your book has been rare? Why so many concern for the book? But almost any people feel that they enjoy to get reading. Some people likes reading, not only science book but also novel and Knowledge Discovery from Data Streams (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) as well as others sources were given know-how for you. After you know how the truly great a book, you feel wish to read more and more. Science guide was created for teacher as well as students especially. Those publications are helping them to include their

knowledge. In different case, beside science book, any other book likes Knowledge Discovery from Data Streams (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) to make your spare time far more colorful. Many types of book like this one.
