Learn the public health implications of shifting drug-related risks among the inner city poor

Inner city drug use behavior shifts and changes, leaving past drug treatment programs, drug prevention efforts, health care provisions for drug users, and social service practice unprepared to effectively respond. *New Drugs on the Street: Changing Inner City Patterns of Illicit Consumption* tackles this problem by presenting the latest ethnographic and epidemiological studies of emerging and changing drug use behaviors in the inner city. This one-of-a-kind resource provides the latest research to help readers reconceptualize ways to think about today's drug use to more effectively address the growing problem.

Unless public health and social service professionals keep in step with the shifting patterns of drug behaviors, drug use epidemics will inevitably unfold. *New Drugs on the Street* reveals the latest drug use practices of the poor in the inner city, with a concentration on the research in African-American and Latino populations. Each chapter gives an in-depth look at the use of various psychotropic drugs most recently gaining popularity, along with the surprising reemergence of PCP. The rampant use of ecstasy in the rave scene is explored, along with the effects of its heavy use, its after-effects, the likelihood of poly-drug mixing, and dangerous sex risk behaviors. Urban youth drug networking is examined in detail. The alarming use of embalming fluid mixtures is discussed, along with the disturbing public health implications of its use. The illicit use of narcotics analgesics (NA) like Vicodin and other pain killers is also explored, including the unclear association between NA use and Hepatitis C. A final chapter presents the latest information on Haitian youth and young adults in Miami, Florida, with ethnographic background to illustrate the reasons for drug use in this and other ethnic minorities. This valuable source is extensively referenced and includes several helpful tables to clarify research data.

New Drugs on the Street examines:

- ecstasy
- diverted pharmaceutical painkillers
- PCP
- embalming fluid
- narcotics analgesics (NA)
- drug use dynamics
- the changing street drug scene
- new drug combinations
