The Legal Order of the Oceans: Basic Documents on the Law of the Sea (Documents in International Law)

This compendium of documents brings together, for the first time in an affordable format, the essential documents needed to gain a thorough knowledge of the laws of the sea. There has been a long felt need for such a collection to provide students, scholars and practitioners with a working library of the key materials. This collection integrates documents of the International Maritime Organisation (which are not available anywhere on the web in consolidated form), of regional fisheries organizations, security related documents, treaties concerning resource exploitation, environmental protection measures and much more, into the framework created by the Law of the Sea Convention. The book is aimed at teachers and practitioners in the area and can be used as a class room companion for law of the sea courses.
