Atlas of Forensic Histopathology Peter M. Cummings

This atlas describes the histologic changes relevant to the modern practice of forensic pathology. It guides the reader through the common questions that the forensic pathologist will need to answer in relation to the cause of death, such as: is this feature artifact or is this real? What does this signify? How old is this injury? The book focuses on key issues of forensic importance - e.g. sudden death, environmental deaths, injury timing and suspected child abuse. The book is highly illustrated with color photographs to increase the understanding of changes related to disease, decomposition and artifact. All illustrations are also available on a CD-ROM packaged with the print book. Ideal as a source of quick reference next to the microscope, this is essential reading for forensic pathologists, forensic pathology fellows, pathologists who consult in forensic cases, pathology residents, autopsy pathologists, coroners and forensic investigators.
