For men and women in addiction recovery, sexual behavior linked with drug or alcohol use is too often the primary reason for relapse. When sexuality is not directly and positively addressed in drug and alcohol treatment, it can result in treatment failure or relapse.

This group facilitator's guide introduces a pioneering, evidence-based curriculum, designed to integrate concepts of sexual health, current sex research, and recent developments in relapse prevention research. With this guide, group facilitators can offer clients a positive and safe forum within which to understand and change their sex/drug- linked behaviors.

Key Features:

- Requires no specialized training, and can be integrated into a wide variety of treatment programs with all types of clientele
- Contains lesson plans on dating and relationships, spirituality and sexuality, non-consensual sex, out-of-control sexual behavior, and more
- Complete with suggested group activities, guided discussions, questions, role- plays, and more
- Has been proven to improve client retention and decrease sexual behavioral problems
