Graphics for Statistics and Data Analysis with R (Chapman & Hall/CRC Texts in Statistical Science)
Kevin J. Keen

Graphics for Statistics and Data Analysis with R presents the basic principles of sound graphical design and applies these principles to engaging examples using the graphical functions available in R. It offers a wide array of graphical displays for the presentation of data, including modern tools for data visualization and representation.

The book considers graphical displays of a single discrete variable, a single continuous variable, and then two or more of each of these. It includes displays and the R code for producing the displays for the dot chart, bar chart, pictographs, stemplot, boxplot, and variations on the quantile-quantile plot. The author discusses nonparametric and parametric density estimation, diagnostic plots for the simple linear regression model, polynomial regression, and locally weighted polynomial regression for producing a smooth curve through data on a scatterplot. The last chapter illustrates visualizing multivariate data with examples using Trellis graphics.

Showing how to use graphics to display or summarize data, this text provides best practice guidelines for producing and choosing among graphical displays. It also covers the most effective graphing functions in R. R code is available for download on the book's website.

From reader reviews:

Theresa Gordon:

The reason why? Because this Graphics for Statistics and Data Analysis with R (Chapman & Hall/CRC Texts in Statistical Science) is an unordinary book that the inside of the reserve waiting for you to snap that but latter it will shock you with the secret the idea inside. Reading this book beside it was fantastic author who else write the book in such incredible way makes the content on the inside easier to understand, entertaining means but still convey the meaning fully. So , it is good for you for not hesitating having this any more or you going to regret it. This excellent book will give you a lot of advantages than the other book get such as help improving your ability and your critical thinking means. So , still want to hesitate having that book? If I were you I will go to the publication store hurriedly.

Joel Connolly:

Graphics for Statistics and Data Analysis with R (Chapman & Hall/CRC Texts in Statistical Science) can be one of your nice books that are good idea. Many of us recommend that straight away because this guide has good vocabulary that could increase your knowledge in language, easy to understand, bit entertaining but nevertheless delivering the information. The copy writer giving his/her effort to place every word into pleasure arrangement in writing Graphics for Statistics and Data Analysis with R (Chapman & Hall/CRC Texts in Statistical Science) nevertheless doesn't forget the main stage, giving the reader the hottest as well as based confirm resource details that maybe you can be one among it. This great information could drawn you into fresh stage of crucial pondering.

Celeste Silver:

As a university student exactly feel bored for you to reading. If their teacher questioned them to go to the library as well as to make summary for some reserve, they are complained. Just very little students that has reading's spirit or real their leisure activity. They just do what the trainer want, like asked to go to the library. They go to there but nothing reading really. Any students feel that studying is not important, boring in addition to can't see colorful photos on there. Yeah, it is for being complicated. Book is very important for yourself. As we know that on this era, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. Therefore this Graphics for Statistics and Data Analysis with R (Chapman & Hall/CRC Texts in Statistical Science) can make you experience more interested to read.

Joel Barnhardt:

Reading a book make you to get more knowledge as a result. You can take knowledge and information from the book. Book is written or printed or outlined from each source that will filled update of news. Within this modern era like today, many ways to get information are available for an individual. From media social like newspaper, magazines, science e-book, encyclopedia, reference book, book and comic. You can add your knowledge by that book. Are you ready to spend your spare time to spread out your book? Or just trying to

find the Graphics for Statistics and Data Analysis with R (Chapman & Hall/CRC Texts in Statistical Science) when you desired it?
