The Mathematical Structure of Raster Graphics

Eugene L. Fiume

The Mathematical Structure of Raster Graphics Eugene L. Fiume

The Mathematical Structure of Raster Graphics presents a mathematical characterization of the structure of raster graphics, a popular and diverse form of computer graphics. The semantics and theory of the mathematical structure of raster graphics are discussed. Notations that help to clarify some of the concepts generally considered to be fundamental to computer graphics are included.

Comprised of seven chapters, this book begins with a description of a general framework for specifying and manipulating scenes. Basic graphic entities, called primitive graphic objects, are defined using a simple notation over a Euclidean space. The reader is then introduced to a semantics of visibility; a mathematical semantics of rendering, developed using the very basic notion of measure; and a mathematical formalization of bit-mapped graphics. A framework for specifying illumination models is also described, along with the complexity of abstract ray tracing.

This monograph will be a useful resource for undergraduate and graduate students, researchers, and practitioners in the fields of mathematics and computer graphics, and to those with some basic computer graphics background.

From reader reviews:

Carlos Garcia:

Hey guys, do you wishes to finds a new book you just read? May be the book with the name The Mathematical Structure of Raster Graphics suitable to you? Typically the book was written by famous writer in this era. Often the book untitled The Mathematical Structure of Raster Graphicsis the main of several books that everyone read now. This specific book was inspired lots of people in the world. When you read this reserve you will enter the new way of measuring that you ever know just before. The author explained their thought in the simple way, therefore all of people can easily to understand the core of this e-book. This book will give you a great deal of information about this world now. To help you to see the represented of the world in this particular book.

Renee Wood:

The reserve with title The Mathematical Structure of Raster Graphics includes a lot of information that you can discover it. You can get a lot of profit after read this book. This specific book exist new information the information that exist in this e-book represented the condition of the world currently. That is important to yo7u to find out how the improvement of the world. This particular book will bring you throughout new era of the glowbal growth. You can read the e-book on your smart phone, so you can read it anywhere you want.

Sally McGarvey:

In this time globalization it is important to someone to get information. The information will make someone to understand the condition of the world. The fitness of the world makes the information much easier to share. You can find a lot of references to get information example: internet, paper, book, and soon. You will observe that now, a lot of publisher that print many kinds of book. The actual book that recommended for your requirements is The Mathematical Structure of Raster Graphics this publication consist a lot of the information with the condition of this world now. This kind of book was represented how can the world has grown up. The vocabulary styles that writer require to explain it is easy to understand. Often the writer made some research when he makes this book. Honestly, that is why this book ideal all of you.

Cherry Simard:

As a college student exactly feel bored to help reading. If their teacher expected them to go to the library in order to make summary for some e-book, they are complained. Just little students that has reading's soul or real their passion. They just do what the trainer want, like asked to the library. They go to generally there but nothing reading really. Any students feel that reading is not important, boring along with can't see colorful images on there. Yeah, it is to get complicated. Book is very important to suit your needs. As we know that on this period of time, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. So, this The Mathematical Structure of Raster Graphics can make you sense more interested to read.
